**spaceimadeit** PROMOTED — 22 Jan, 1:28

1. What automation engine will be used (Zapier / Make / n8n / queues / cron)?
2. Will workflows be editable by me after delivery?
3. Which integrations are INCLUDED (payments, email/SMS, CRM, webhooks, Google tools)?
4. Will I own the OpenAI account, API keys, and Git repo?
5. Will there be an admin dashboard to manage users, prompts, and knowledge base?
6. How is RAG data uploaded, updated, and secured?
7. What is included in post-delivery support vs extra cost?
8. Where will the system be hosted and who controls hosting?

This message relates to:

I will develop n8n automation, n8n workflow, ai automation, or n8n ai agent

**Me** — 22 Jan, 1:32

Hello there,

Greetings and welcome. It's nice to have you here. Please allow me a few moments to review it. I will get back to you soon with my thoughts.

Regards,
Razibul

**Me** — 22 Jan, 1:42

Hello again,

Thank you for your questions. Here are the details regarding the automation system:

1. Automation engine: n8n
2. Editable workflows: Yes, fully editable by you
3. Included integrations: G-m-a-i-l/SMTP, Google Drive/Sheets/Calendar, Webhooks; others only if in scope (Based on needs)
4. Ownership: Yes, you own all OpenAI accounts, API keys, and Git repos. (need to provide from your end)
5. Admin dashboard: No, not included (If needed, I can provide)
6. RAG data: Upload/update/security handled by you; o-u-t-s-i-d-e standard workflow
7. Post-delivery support: 45 days included for bugs and minor fixes; extra features cost extra
8. Hosting: Your choice (n8n.cloud or self-hosted); you control hosting

Let me know your full project details so that I can make a plan according to your needs.

**spaceimadeit** — 22 Jan, 3:30

This looks good.
To confirm before proceeding:

1. I want a basic admin dashboard (Next.js or similar) to:
   - View users / leads
   - Trigger or monitor automations
   - Manage RAG uploads
   - Control prompts (no code)
2. n8n will run automations, but the dashboard is my control layer.

Please confirm:

- If you can build this
- What's included vs extra cost
- Estimated timeline

**Me** — 22 Jan, 3:34

Thank you for your response. Yes, of course, I can provide you with an admin Dashboard.

Edited

**Me** — 22 Jan, 4:12

To complete the full system, it will take 30-40 days, and an investment of $1700-$2000 USD is needed.

If that works for you, we can make the next plan.

**spaceimadeit** — 22 Jan, 4:44

Add Stripe monthly subscriptions in addition to one-time payments.

Requirements:

- Client can choose one-time or monthly plan
- Subscription status controls portal access
- Auto billing, retries, cancel/resume
- n8n automations for subscription events
- Admin view of subscription status

Confirm this is included and how it's implemented.

**Me** — 22 Jan, 5:02

Hello again,

Thank you for clearly outlining your requirements. I've reviewed everything, and I can confidently build the complete system you described, including the admin dashboard, n8n automations, AI logic, and S-t-r-i-p-e p-a-y-m-e-n-ts.

Project Price & Timeline

Price: $2000 USD
Timeline: 35–45 days

What I'll Deliver:
- n8n-powered automation engine to handle all workflows
- AI workflows integrated with OpenAI (GPT-4)
- Basic admin dashboard (Next.js or similar)
- S-t-r-i-p-e integration

This buyer hasn't placed any orders yet. When they do, you'll see data here.

- S-t-r-i-p-e integration
- Clean, scalable architecture suitable for an agency model
- System documentation and walkthrough
- 45 days post-delivery support

What I'll Need From You:
- Access to your n8n instance (cloud or self-hosted)
- OpenAI API key (owned by you)
- S-t-r-i-p-e account access (for webhooks and products)
- Hosting access for the dashboard
- Final confirmation of required integrations
- Any other things, if needed, will be discussed during the development phase

This solution is designed to be reusable, scalable, and fully under your control, allowing you to onboard new clients without rebuilding the system.

If this works for you, I can send a custom offer, and we can get started immediately.

Best regards,
Razibul

**spacelmadelt** 22 Jan, 5:36

Thanks, this works for me.
Before moving forward, I just want to confirm a few items so scope is clear:
1. Stripe includes one-time payments AND monthly subscriptions, with webhooks for payment success, failed payments, and cancellations controlling client access.
2. The admin dashboard will allow me to view clients, subscription status, uploaded documents, VA notes, and approve or return cases.
3. Uploaded documents will be stored securely with role-based access (client / VA / admin).

If these are confirmed within the current scope, I'm ready to proceed and accept the custom offer

**Me** 22 Jan, 6:01

Absolutely, these are confirmed with the current scope. I am sending you the custom offer to get started.

**Me** 22 Jan, 6:02

Here's your custom offer

**I will develop n8n automation, n8n workflow, ai automation, or n8n ai agent** **US$2,000**

Withdraw offer

**Me** 22 Jan, 6:0

Here you go. Please accept it, and let's bring your vision to life.

**spacelmadelt** 22 Jan, 6:16

Everything looks good.
To keep things structured, I'd like to move forward with 4 milestone payments over the 45-day timeline:
1. 25% ($500) – Project kickoff & setup
2. 25% ($500) – Core system & Stripe payments live
3. 25% ($500) – Admin dashboard, VA workflow, AI logic
4. 25% ($500) – Final delivery, documentation, and handoff

Each payment is released upon completion of the milestone.
If this works for you, feel free to send the custom offer with these milestones

**Me** 22 Jan, 6:29

Thank you very much for your continued interest in working together.

You're welcome to proceed with the full upfront p-a-y-m-e-n-t. Fiverr is a highly professional and secure platform, and the funds will be safely held until I deliver the agreed-upon work. The p-a-y-m-e-n-t is only released once the project is completed and you're satisfied with the delivery.

That said, if you'd prefer, we can absolutely split the project into two milestones, 50% for the first phase and 50% for the second phase.

I truly believe this will be a great collaboration, and I'm excited to bring this project to life together.

**Me** 23 Jan, 0:44

Hello,

I hope you are doing well and in good health.

Just dropping a quick note to say hello and let you know that I'm eagerly awaiting your response.

**spacelmadelt** 08 Mar, 16:16

Hello sir !

Hope all is well. I'm ready to proceed with splitting the p a y m e n t into two milestones .

50% for the first phase 50% for the second phase .

**spacelmadelt** 08 Mar, 16:16

Is there a way we can get it done in a sooner timeline ?

**Me** 08 Mar, 16:17

Message deleted

**Me** 08 Mar, 16:25

Thank you for your response.

I am open to the two-milestone phase, so I will be sending the offer to you shortly.

Regarding the timeline, I always aim to deliver projects ahead of schedule for my clients. However, I hope you understand that automation projects are different from standard web development projects. A minor error can halt the entire workflow, so I require precise testing and monitoring, which takes time and patience.

For your peace of mind, I am committed to completing this project within 40 days.

**Me** 08 Mar, 16:26

Here's your custom offer

**I will develop n8n automation, n8n workflow, ai automation, or n8n ai agent** **US$1,000**

**Me** 08 Mar, 17:01

Please accept the custom offer, fill in the requirement box and let's get started.

**spacemadeit** 08 Mar, 17:06

Before proceeding, ask specifically whether the system includes:

1. A dedicated database for client records
2. Workflow error monitoring and retry handling
3. Modular workflow architecture

**Me** 08 Mar, 17:13

Thanks for the final questions- happy to clarify.

Dedicated Logs Database:

Yes, the system will include a structured database (Airtable or PostgreSQL, whichever you prefer) to log all actions, successes, and failures. This gives you a full history of everything the agent does.

Error Monitoring & Retries:

This will be built into the workflow. If something fails due to a temporary API issue or site delay, the system will automatically retry before sending you an alert.

Modular Architecture:

The automation will be built in a modular way, so we can easily add new test cases or expand the system later without rebuilding everything.

All of this is included in the $2,000 scope as part of a professional, agency-grade setup.

Let me know if everything looks good so we can move forward with Phase 1.

**spaceimadeit** 08 Mar, 18:15

This all sounds good, and I appreciate the clarification.
Before we move forward with Phase 1, I want to confirm a few final details so everything is clear on scope and ownership:

1. I will own the full codebase, workflows, database structure, and final system after delivery.
2. The system will be built inside accounts that I control, including n8n, OpenAI, Stripe, database, and hosting.
3. Please list the exact Phase 1 deliverables included in the $2,000 scope.
4. Please confirm what is not included in the current scope and would require an added milestone later.
5. Please confirm the timeline, milestone expectations, and what happens if a key feature is delayed or does not function as described.

Also, for the database, I would prefer PostgreSQL over Airtable for long-term scalability.
Once you confirm those points, I'll be in a much better position to move forward.

**Me** 08 Mar, 18:17

Let me get back to you shortly with a detailed clarification.

Thank you.
